

Manipal Academy of Higher Education, Manipal

PhD Research Areas available for candidates already having a fellowship

Department of Statistics

- Approaches to Learning and Learning Style
- Bayesian Methods
- Biostatistics
- Covariance Matrices and Applications
- Discrete Data Modeling
- Epidemiology
- Generalized Inverse of Matrices and its Applications
- Graph Theory and Matrices in Graph Theory
- Linear Models
- Longitudinal Data Analysis
- Measurement and Evaluation in Higher Education
- Modeling in Public Health Research
- Multivariate Methods
- Nonnegative Matrices
- Partial ordering of Matrices and Shorted matrix
- Projective Modules and Matrices over Commutative Rings
- Regular Rings
- Secondary Data Analysis and Generalized Linear Models
- Spatial Epidemiology
- Statistical Genetics
- Stochastic Modeling for Non-communicable Diseases
- Systematic Review and Meta analysis
- Women in Higher Education
