## How to read the detailed timetable?

The timetable makes use of colours to indicate the department and systems. It also uses colour coding of the boxes to indicate integration.

The colours used for various systems are as below:

Colour codes for system
1. General
2. Cardiovascular system
3. Digestive system and Excretory system (includes Hepatobiliary)
4. Endocrine system
5. Sensory system (includes skin, eyes, & ears)
6. Immune system, lymphatic system & Haematology
7. Musculo-skeletal system
8. Nervous system
9. Renal system and Urinary system
10. Reproductive system
11. Respiratory system

P.S. General is used in case the topic does not fit into any system or involves multiple systems

The colours used for fonts of various departments are as below:

Colour Codes for different departments	
Community Medicine	Paediatrics
Forensic Medicine	Orthopaedics
Ophthalmology	Anaesthesiology
Otorhinolaryngology	Dermatology
Medicine	Psychiatry
Surgery	Radiodiagnosis/Radiation Oncology
OBG	Respiratory Medicine

The box of the cells containing classes/sessions having integration have been highlighted as below:

**Border shading for different types of integration**

Nesting

Sharing

Correlation

In addition to this, there is text in the box indicating the level of integration and department(s).

Colour codes have also been used to highlight the pandemic module, AETCOM module & the dedicated time provided for Simulation & Research. The codes are explained below.
