

Obstetrics & Gynaecology Department, KMC, Manipal

1. Why to choose MS Obstetrics & Gynaecology at KMC Manipal?

Department of obstetrics and gynaecology at Kasturba Medical College has kept abreast with the happenings in this branch elsewhere in the world. It has subspecialty divisions in the specialties of Reproductive Medicine and Surgery (performing all assisted reproductive techniques), Maternal and Fetal Medicine (catering for high risk obstetrics and fetal medicine), Gynaecological Oncology (offering both screening and treatment), Minimal Invasive Surgery (performing all sorts of endoscopic surgeries), Urogynecology (catering to urogynecological issues, prolapse, sexual and aesthetic gynaecology).

Department has many ongoing collaborative research projects with other institutions of Manipal Academy of Higher Education, ICMR projects and projects funded by other International agencies. Currently the department has grant exceeding 1.5 crores. Department has signed MOUs with ICMR-NIRRH for research on endometriosis. Division of fetal medicine is planning to sign an MOU with Company working on Artificial Intelligence. Department has International Visiting Students from USA, UK, Netherlands, Australia and Malaysia.

Department has state of the art infrastructure facility for both patient care and research. It has experienced faculty who have guided thousands of undergraduate and hundreds of postgraduate students and our alumni have occupied reputed positions in esteemed institutions in India and abroad. Hence the students who join the department have tremendous scope to pursue the field of their interest in Obstetrics & Gynaecology and excel.
